Configuration Management Engineer

DirectViz Solutions, LLC, a high-level strategic consulting services firm that meets mission needs for commercial and government clients, is seeking a Configuration Management Engineer. This position will be located at Joint Base Andrews, Md. and requires an active Secret clearance.

Responsibilities:

- Provide a Monthly Status Report and/or weekly status brief as required
- Provide analysis and recommendation to the Government for processes to integrate SCOM, SCCM, Remedy, and BladeLogic and other systems into a Centralized Enterprise Configuration Management System (CMS) and assist with its implementation.
- Provide analysis and recommendations to ensure recommended CM tool(s) evolve the breadth and scope of content in the CM repository; develop and build custom reports based on executive user requirements; integrate models from other tools into repository.
- Coordinate with the 844th CG CM office and other organizations in terms of administering, merging, or combining repositories on a regular basis
- Ensure that the Configuration Management process's address Discovery, Configuration Identification, Configuration Status Accounting (CSA), Configuration Control, Configuration Verification/Audits, Data Management, Engineering Data Management, Deficiency Reporting and remediation.
- Assist in the performance of Functional Configuration Audits (FCAs) and Physical Configuration Audits (PCAs) and ensure all audit issues are resolved or mitigated prior to acceptance.
- Periodically validate that the approved CM baselines have not been modified without the proper authorization.

Qualifications:

Active Secret Clearance

- MS Degree in Information Technology, Business Information Systems or related field.
- 5+ years knowledge and experience with IT Governance and control frameworks.
- 10+ years hands on software/hardware configuration management, development, or testing experience within the past 10 years.
- ITIL Service Manager Certification (ITSM), CMIIC Level 3, ISO 9001:2008 and ISO 20000-1:2011

Required Skills:

- Experience using SCOM, SCCM, Remedy, and BladeLogic is highly desired
