

GOVERNANCE. PEOPLE. PROCESSES. TECHNOLOGIES.

## LAB UNIX SYSTEMS ADMINISTRATOR

DirectViz Solutions, LLC, a high-level strategic consulting services firm that meets mission needs for commercial and government clients, is seeking a full-time Lab UNIX Systems Administrator to support the Defense Information Systems Agency (DISA) headquarters in Fort Meade, MD. DISN capabilities are functionally a system-of-systems entity that is in a continuing sustainment phase of its life cycle. This effort will provide system testing support to the Defense Information Systems Agency (DISA).

### Responsibilities:

- Provide technical expertise and guidance in support of the formal testing of new features and/or system enhancements to the OSS;
- Verify continued system performance and stability before, during and after formal testing;
- Follow strict testing procedures to ensure integrity of formal testing processes;
- Identify enhancements and improvements to the OSS systems and/or testing processes to improve efficiency and overall data integrity of the OSS;
- Maintain OSS test labs to ensure system integrity;
- Maintain all network and system architecture and design documents in accordance with set Standard Operating Procedures;
- Provide assistance in the procurement of components and services to support system maintenance, implementation and operation;
- Evaluate and recommend hardware and protocol alternatives to be used in the customer systems architecture;
- Support Information Assurance personnel to ensure security architecture, design, and implementation is in accordance with DoD regulations;
- Coordinate with other SMEs and with clients to evaluate technology needs, recommend improvements, and implement modifications to existing OSS architecture and testing processes.
- Must be able to assist with installation and removal of servers from racks.

### Requirements:

Secret Clearance (Active)  
US citizen

- Bachelor's Degree in Computer Science or equivalent experience
- DoD Directive 8570 Information Assurance Technical (IAT) Level II compliant
- Must have strong oral and written communication skills.
- Must be able to work in a large team environment.
- Must have Oracle and virtualization [i.e. OEM, LDOM, and command line] experience and can mentor and provide guidance to less experienced personnel.

### Desired Skills/Certifications:

- 3+ years designing, implementing and maintaining Solaris 10 systems
- 2+ years designing, implementing and maintaining Windows Server 2003 or later systems
- ITIL v3 Foundation Certification
- Sun Certified Solaris Administrator (Oracle Solaris 10 System Administrator Certified Professional)
- Advanced proficiency in Oracle operating systems
- Advanced proficiency in Windows operating systems
- Advanced proficiency in server virtualization with Oracle and VMWare (Sun Virtualization: Solaris 10 Containers Administration)
- Advanced proficiency in server virtualization with Oracle and VMWare (Sun Virtualization: Solaris 10 Containers Administration)
- Microsoft Certified System Administrator or Microsoft Certified IT Professional - Server Administration
- Working knowledge of OSSs and components such as Network Fault and Performance Management, Change and Configuration Management, Trouble Ticketing Systems, Enterprise Dashboarding,
- Data Integration and Reporting
- Working knowledge of the eHealth and NetCool applications
- Working knowledge of encryptors
- Proficiency in industry standard Microsoft desktop applications
- Knowledge of and experience with BMC Remedy
- Advanced proficiency in scripting languages especially PERL, JavaScript, TKL and UNIX Shell Scripting
- Knowledge of Vulnerability Management System (VMS)
- Knowledge of Cybercom responsibilities
- Knowledge of running DISA STIGs on Solaris and Window servers
- Ability to create and maintain a STIGed baseline OS for system installations
