SAS Administrator/Analyst

DirectViz Solutions, LLC, a high-level strategic consulting services firm that meets mission needs for commercial and government clients, is seeking a full-time SAS Administrator/Analyst at DMDC located at Seaside, Ca.

Responsibilities:

- Skilled understanding of server and/or desktop administration
- In-depth knowledge of SAS software usage
- Experience running SAS in multiple platforms, to include Windows, UNIX, and mainframe
- Experience implementing a SAS grid architecture
- Implement Active Duty & Reserve File Submission Processing
- Provide a high-availability SAS approach
- Perform SAS software administration; including software configuration, updates, patches, and hotfixes and license renewals as needed
- Provide SAS Platform capacity planning, metrics and performance tuning recommendations
- Execute actions necessary to achieve and maintain optimum SAS platform performance, reliability and availability
- Identify bottlenecks in production systems and provide solutions
- Design, implement, and maintain platform security via SAS Metadata, Linux operating systems, LDAP/Active Directory, and data warehousing environments
- Manage metadata identities, users, groups, and roles
- Use SAS Management Console to define connections to data sources, define libraries, and create metadata objects and folder structures
- Manage permissions to metadata objects
- Configure and test communication between SAS and multiple relational databases
- Act as a SAS subject matter expert and liaison to SAS users and IT
- Serve as an escalation point for production and/or platform issues and acts as lead liaison with Technical Support to resolve outstanding issues within the SAS environment

REQUIREMENTS:

Secret/SSBI

Bachelor's degree in Management Information Systems or equivalent experience and a minimum of 3-5 years of related experience

Desired Skills/Certifications:

Working knowledge of multiple SAS product platforms, to include SAS Business suite
Experience migrating data from a mainframe flat-file architecture to a SAS toolset architecture
Experience performing Software Development Lifecycle (SDLC)
