IA/Computer Security Team Lead

DirectViz Solutions, LLC, a high-level strategic consulting services firm that meets mission needs for commercial and government clients, is seeking an IA/Computer Security Team Lead. This position will be located at Ft. Belvoir, VA. and requires an active TS/SCI.

IA/Computer Security Team Lead:

Implement DoD Security Technical Implementation Guides (STIGS) and remediation for all new IT solutions related to IT projects, address issues, and prepare all necessary paperwork for submission to Senior IA Office (SAIO) until Authority to Operate is granted by DAG2 or Army CIO-G6/G6/GISA and this action must be achieved for each task associated to the completion of Projects/Programs.

Review and submit all Concept of Operations (CONOPS), EIPs, and supporting artifacts for the accreditation/authorization process to ensure compliance with ICD 503 and RMF requirements.

Maintain status updates for the entire network security infrastructure and Information Assurance Vulnerability Management (IAVM) to support quarterly FISMA requirement.

When performing compliance inspections, ensure all IA policies are enforced at INSCOM in accordance with applicable guidance and document/report non-compliance and to designated government personnel.

Implement and maintain IA security solutions (e.g. Host Based Security System (HBSS), ACAS, Harris Stat, Data at Rest (DAR) Information Assurance (IA) tools.

Qualifications:

TS/SCI Clearance

- BS or equivalent
- CompTIA Security+CE certification
- CISSP, CISM certifications
- 10-12 years of experience

Responsibilities:

Manage all aspects of PWS 5.3; oversee a team versed in RMF and security operations; ensure all cyber tools are properly tuned and utilized to maximize security; lead a proactive vulnerability management program to identify and remediate issues; oversee or assign incident response tasks and ensure they are adequately addressed.
