Senior Developer/Programmer (Java/.Net/Oracle)

DirectViz Solutions, LLC, a high-level strategic consulting services firm that meets mission needs for commercial and government clients, has multiple positions for a full-time Senior Developer/Programmer (Java/.Net/Oracle). This position, located in "Pensacola, FL".

Responsibilities:

Manage and oversee the quality of developer/programmer services and deliverables, providing training and development support to less experienced developer/programmer staff. Lead and participate in highly complex system projects. Design or develop software systems, using scientific analysis and mathematical models to predict and measure outcome and consequences of design. Consult with managerial, functional, and technical personnel to define program requirements. Analyze user needs to determine technical requirements. Confer with engineering staff to evaluate interface between hardware and software, develop specifications and performance requirements, or resolve customer problems. Write, analyze, review, and rewrite programs, using workflow charts and diagrams, and applying knowledge of computer capabilities, subject matter, and symbolic logic. Prepare detailed workflow charts and diagrams that describe input, output, and logical operation, and convert them into a series of instructions coded in a computer language. Refine and customize products such as forms, reports, SQL and PL/SQL procedures to meet IT requirements using developer products. Analyze information to determine, recommend, and plan installation of new systems or modification of existing systems. Assist in configuration and installation of developer products on laptop and/or desktop computer configurations. Consult with and assist computer operators or system analysts to define and resolve problems in running computer programs. Investigate whether networks, workstations, the central processing unit of the system, or peripheral equipment are responding to a program's instructions. Apply business and data manipulation principles and methods to technical problems to arrive at automated solutions. Develop or direct software system testing or validation procedures. Compile and write documentation of program development and subsequent revisions, inserting comments in the coded instructions so others can understand the program. Write or contribute to instructions or manuals to guide end users. Possess high-level oral and written communications skills; effectively communicate with all levels of client management, contractor managers and client agency representatives; adept in generating and conducting briefings, presentations
