Director Software Engineering

DirectViz Solutions, LLC, a high-level strategic consulting services firm that meets mission needs for commercial and government clients, is seeking a Director of Software Engineering. This position will be located in Kearneysville, WV and requires a Public Trust or Secret clearance.

Responsibilities:

- Provide technical leadership to Software Engineering for delivery of software applications within the federal sector conforming to DHS and DoD standards
- Provide technical leadership to Software Engineers for delivery of core software products
- Participate in and lead design, architecture decisions and technical solutions
- Work directly with customers on technology integration requirements and troubleshooting
- Work closely with Product Management and other stakeholders to understand requirements, accurately scope, schedule and execute software engineering work
- Develop processes and systems to ensure a fast-moving, predictable delivery schedule using an agile process (Scrum / DevOps)
- Lead the software development lifecycle including managing releases, ensuring product requirements are met, scheduling Sprints, managing backlogs and running standups and relevant meetings
- Actively participate in hiring, training, mentoring and performance reviews of engineering staff
- Develop software engineering standards and best practices. Implement industry best practices
- Keep abreast of new technologies and techniques and identify relevant technologies that would benefit our products
- Provide hands on technical problem solving and coding when required for troubleshooting and issue resolution

Qualifications:

Secret or Public Trust Clearance

- Bachelor's degree in Computer Science / Engineering (or similar technical degree) or relevant experience.
- 7 years of hands on software development experience, ideally around Software as a Service (SaaS) models
- 10 years of experience leading software development teams in Java/.NET
- Experienced in successful software delivery within a fast-paced environment
- Proven history of excellent technical problem solving abilities
- Experience with resource planning, project tracking and accurately scoping work

Required Skills:

- Ability to manage and prioritize multiple software development projects
- Familiarity with Microsoft Project
