SENIOR NETWORK ENGINEER

DirectViz Solutions, LLC, a high-level strategic consulting services firm that meets mission needs for commercial and government clients, is seeking a full-time Senior Network Engineer supporting the Defense Information Systems Network (DISN) Operational Support Systems (OSS) Division at Defense Information Systems Agency (DISA). DISN capabilities are functionally a system-of-systems entity that is in a continuing sustainment phase of its life cycle. This effort will provide support services associated with network and system management and other related support services for DISA and DOD Military Services and Agencies, and other U.S. Government Departments and Agencies on a global basis.

Requirements:

Secret Clearance (Active)

US citizen

- Bachelor's Degree or equivalent experience
- Excellent verbal and documentation skills
- Ability to participate on an on-call 24x7x365 roster
- Minimum 5-8 years of experience providing break/fix support, troubleshooting, and engineering of networking services in dynamic and high visibility environment
- Cisco and Firewall configuration and architecture experience
- Availability for daytime shift work.

Responsibilities:

- Serve as an experienced source for Network Engineering, Design, and Implementation services for a large and complex Defense Information Network; providing configuration, and maintenance to the DISA test lab network.
- Experience with Cisco and network device setup and architectures in addition to various firewalls, encryption devices, Cisco, and Juniper products.
- Provide break/fix incident management support for network outages and move/add/change incidents;
- Support the operation, maintenance, and modernization of a data converged network;
- Provide direction, analysis, and recommendations on the optimization of monitoring tools;
- Identify, document, and report operational risks in the environment;
- Develop proactive monitoring parameters that allow for resolution of potential issues prior to user impact;
- Responsible for creating test plans, reports, and implementation plans and disseminate to Tier II personnel;
- Responsible for maintaining compliance with Information Assurance Vulnerability Management (IAVM) and Security Technical Implementation Guide (STIG) compliance;
- Provide all of the Operations, Administration, Management, and Provisioning capabilities for all technologies of the DISN using commercial best practices, industry technologies and standards, and international frameworks.
- Test solutions for deployment in the field, and provide developers the necessary information to perform their functions in the lab.
