SENIOR NETWORK ENGINEER

DirectViz Solutions, LLC, a high-level strategic consulting services firm that meets mission needs for commercial and government clients, is seeking a full-time Senior Network Engineer supporting a DoD Federal Government customer at DMDC located at Seaside, CA.

Responsibilities:

- Serve as an experienced source for Network Engineering, Design, and Implementation services for a large and complex network; providing configuration, and maintenance to the network.
- Experience with Cisco and network device setup and architectures in addition to various firewalls, encryption devices, Cisco, and Juniper products.
- Provide break/fix incident management support for network outages and move/add/change incidents;
- Support the operation, maintenance, and modernization of a data converged network;
- Provide direction, analysis, and recommendations on the optimization of monitoring tools;
- Identify, document, and report operational risks in the environment;
- Develop proactive monitoring parameters that allow for resolution of potential issues prior to user impact;
- Responsible for creating test plans, reports, and implementation plans and disseminate to Tier II personnel;
- Responsible for maintaining compliance with Information Assurance Vulnerability Management (IAVM) and Security Technical Implementation Guide (STIG) compliance;
- Provide all of the Operations, Administration, Management, and Provisioning capabilities for all technologies of the DISN using commercial best practices, industry technologies and standards, and international frameworks.
- Test solutions for deployment in the field, and provide developers the necessary information to perform their functions in the lab.

Requirements:

TS/SCI Clearance (Active)

Must meet must meet DoD 8570.01

Certification requirements

- Bachelor's Degree or equivalent experience
- Excellent verbal and documentation skills
