

SITE III is a multiple-award contract that will deliver IT services and capabilities in support of DIA and the National Geospatial-Intelligence Agency. The Defense Intelligence Agency has released its request for proposals for the potential 10-year, \$12.6B Solutions for the Information Technology Enterprise III contract vehicle. The purpose is to help achieve an advantage in information and communications technology to support warfighters, acquisition leaders and policymakers across the Defense Intelligence Enterprise, according to the statement of work.
